

Project Objectives:

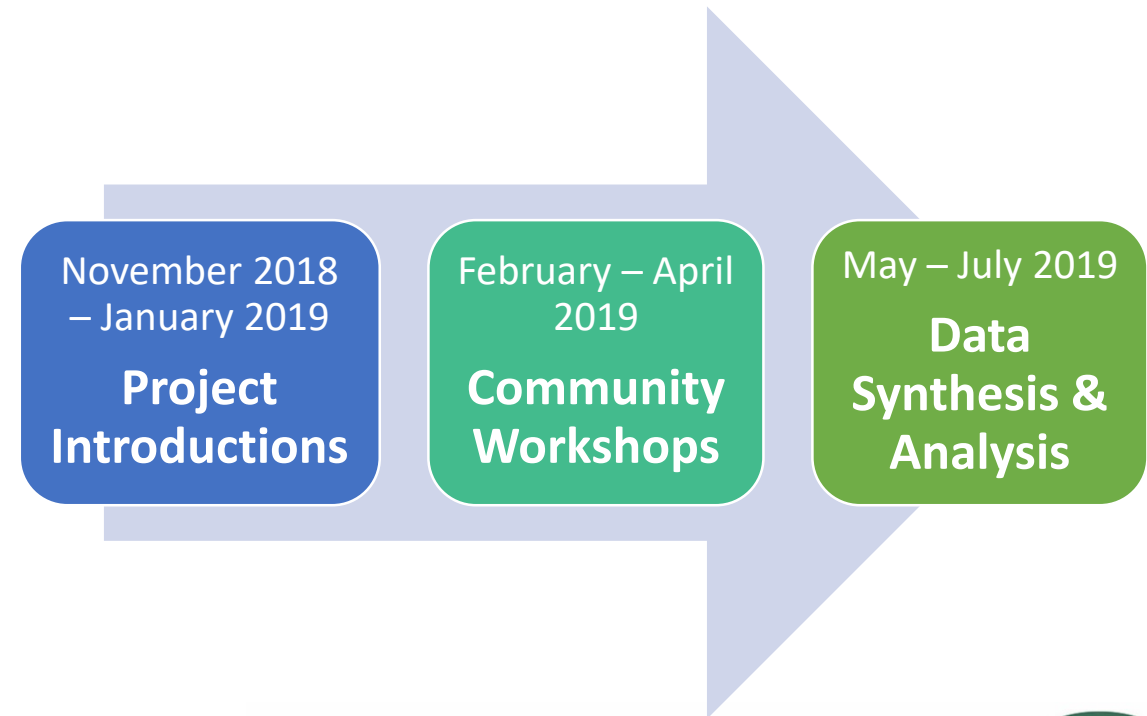

Increasing access to broadband was raised as a community need in each of the first five Community Action Plans completed by the Delta Protection Commission. In response, DPC hired Valley Vision to:

- Assess existing broadband infrastructure for Clarksburg, Courtland, Hood, Isleton, and Walnut Grove.
- Identify and develop potential broadband infrastructure projects through community workshops and meetings with other stakeholders.
- Determine steps needed to implement the projects.
- Collaborate on project implementation as possible.
- Summarize outcomes that will lead to future implementation efforts.

Proposed Timeline:

November 2018 – April 2019
Infrastructure Assessment

DELTA PROTECTION
COMMISSION
